The subject matters of claim 1-10 do not appear to be novel with respect to D1. D1 discloses a water-absorbent resin composition comprising absorbent resin, complex oxide hydrate containing zinc and silicon, or zinc and aluminum, and a plant component.

The subject matters of claim 1-5,7-10 do not appear to be novel with respect to D2-D5.

D2-D5 disclose a water-absorbent resin composition comprising absorbent resin and complex oxide hydrate containing zinc and silicon, or zinc.

The subject matter of claim 6 does not appear to involve an inventive step in view of D2-D8.

D6-D8 disclose a water-absorbent resin composition comprising absorbent resin and a plant component.

The inventions disclosed in D2-D8 share the problem in the deodorant property. The person skilled in the art would easily conceive the idea of applying the technical feature 'a plant component' employed in D6-D8 to the invention disclosed in D2-D5 to solve that problem.
